SUBJECT: Export Control Category Change - People's

The President has directed that the export control category for the People's Republic of China be changed from Category P to Category V while retaining COCOM controls and national security controls on specific mission areas of concern. (S)

The Department of State should begin appropriate consultations with COCOM on this change prior to formally and publicly announcing the decision. The Department should coordinate the terms of reference for these consultations with other concerned agencies. (U)

All departments and agencies should undertake a review, and adjust as appropriate their internal administrative policies and procedures to implement the President's decision. Significant changes effected as a result of this decision should be summarized and forwarded as information to the Assistant to the President for National Security Affairs by June 24, 1983. (U)

As agreed an interagency group will be formed under the NSC Senior Director of Political-Military Affairs to establish the national security framework for technology transfer to the PRC. In addition, approaches will be developed to determine the national security controls required to implement this decision on selected outstanding cases that cover a range of technologies. These actions should be accomplished no later than July 20, 1983. (S)
